

Harvest Operations Corp. is a diverse energy company, based out of Calgary, offering exposure to conventional upstream oil and natural gas production and SAGD operations. We are focused on identifying opportunities to create and deliver value with an active development program and a technical approach taken to maximize our assets. Harvest is committed to protecting the health and well-being of our people, the public and the environment through every decision and action taken each day.

Harvest has an opening for a **Control Room/Unit Operator** reporting to the Shift Lead. This is a full time staff position located at the BlackGold SAGD Facility near Conklin, AB. The successful candidate will reside in a camp facility on a rotational basis.

Key Responsibilities:

- Fill the role of **Assistant Shift Engineer** as per the Power Engineers Regulation of the Safety Codes Act when required
- Temporary coverage of the **Shift Engineer** position.
- Train in all areas of the facility, Steam/Evaporator, Process, Field and the Control Room
- Ensure all process equipment and processes are operated in accordance with control limits and set points.
- Follow procedures and standards pertaining to SAGD operations.
- Ensure compliance with ABSA, AER, OH&S requirements, report any contraventions.
- Actively control and manage processes in the facility during plant upsets.
- Troubleshoot process performance issues.
- Maintain all required safety certification.
- Committed to best practices in health, safety and environmental management.

Qualifications

- **Valid 2nd Class Power Engineering Certificate of Competency.**
- Valid Class 5 Operator's Licence, or equivalent.
- A Degree or Diploma in a related program such as Power Engineering, Mechanical, Petroleum, or Chemical is an asset.
- Minimum 5 years' experience in industrial facilities with exposure to steam, process and control room operations.
- A solid understanding of processes and equipment used in the SAGD process including water-tube boilers, high pH mechanical vapour compressor evaporators, produced emulsion processing, diluent recovery, tank vapor recovery compression, tank inventory management, and produced water de-oiling.
- SAGD experience, as it relates to the above equipment, is an asset.
- Ability to read and interpret facility drawings.
- Self-motivated with a strong work ethic, good communication skills, and a positive attitude.
- Proficient with personal computers, software applications, and facility control systems.

Successful applicants must provide acceptable evidence of being fully immunized against COVID-19 (two doses of Health Canada approved COVID-19 vaccine. Medical or religious exemptions may be considered and granted on a case by case basis.
