

Harvest Operations Corp. is a diverse energy company, based out of Calgary, offering exposure to conventional upstream oil and natural gas production and SAGD operations. We are focused on identifying opportunities to create and deliver value with an active development program and a technical approach taken to maximize our assets. Harvest is committed to protecting the health and well-being of our people, the public and the environment through every decision and action taken each day.

Harvest has an immediate opening for an **Electrician** reporting to the Maintenance Lead. This will be either a staff or contract, full time position located at the BlackGold SAGD Facility near Conklin, AB. The successful candidate will reside in a camp facility on a rotational basis.

Key Responsibilities:

- Supporting the health safety and environmental goals of the project.
- Ensure the reliable operation of electrical systems and equipment.
- Complete electrical maintenance and modifications following electrical codes, manuals, schematics, diagrams, and other specifications.
- Repair and replace electrical components and equipment by diagnosing malfunctions with transformers, motors, VFDs, breakers, wiring, or other components.
- Perform systematic quality checks on all work performed.
- Maintain documentation as required by Electrical Safety Authority.
- Collect, analyze, and summarize electrical equipment data, information, and trends. Making recommendations, as necessary, for improvements.
- Maintain all required safety certification.
- Commitment to best practices in health, safety, and environmental management.

Qualifications

- Valid Inter-Provincial or Provincial Journeyman Certificate, preference will be given to candidates that are dual trade certified (Instrumentation Technician).
- Valid Class 5 Operator's License or equivalent.
- Minimum 5 years working in an industrial facility with Class I hazardous locations.
- Experience with equipment used in the SAGD process, such as CEMS, high voltage transformers and motors, VFDs, is an asset.
- SAGD or other oil and gas commissioning and start-up experience is an asset.
- Ability to read and interpret engineered electrical and instrumentation drawings.
- Self-motivated with a strong work ethic, good communication skills, and a positive attitude.
- Proficient with personal computers, CMMS, and other software applications.
