

Harvest Operations Corp. is a diverse energy company based out of Calgary offering exposure to conventional upstream oil and natural gas production and SAGD operations. We are focused on identifying opportunities to create and deliver value with an active development program and a technical approach taken to maximize our assets.

Harvest has an immediate opening for an **Exploitation Engineer** in the Deep Basin asset reporting to the Subsurface Manager. This is a permanent position based in Calgary.

**Key Responsibilities:**

- Responsible for field development strategies in a Kakwa Montney play including facility expansion requirements.
- Conduct economic evaluations and provide technical recommendations for new locations and completions
- Support drilling and completions operations. Assist in planning for facility expansions.
- Coordinate multi-discipline group of stakeholders to effectively plan, execute & steward development projects.
- Analysis of area competitor activity to benchmark best practices for optimal field development and creation of type curves
- Manage the area's reserves including annual reserves determination of existing assets and reserves determination for acquisitions, divestments, new drills and EOR projects
- Evaluate potential acquisitions and divestitures within the Asset
- Maintain and update monthly and annual production forecasts
- Lead the budget process for the asset team providing input on drilling plans, production forecasts, and project economics
- Ensure full-cycle, comprehensive, long-term development plans and scenarios for core and strategic properties are developed and documented
- Ensure relevant regulatory and environmental requirements are included in the depletion and development plans for the asset
- Provide regular project updates and technical presentations

**Qualifications:**

- Engineering degree and membership in APEGA (or equivalent)
- Minimum of 10 years' experience, ideally including production and operational roles
- Strong English written and oral communication skills
- Strong project and program management skills
- Strong economic and economic modeling skills – proficient in Val Nav
- Strong reservoir engineering background is preferred
- Analytic skills with attention to detail
