

Harvest Operations Corp. is a diverse energy company, based out of Calgary, offering exposure to conventional upstream oil and natural gas production and SAGD operations. We are focused on identifying opportunities to create and deliver value with an active development program and a technical approach taken to maximize our assets. Harvest is committed to protecting the health and well-being of our people, the public and the environment through every decision and action taken each day.

Harvest is posting for a **Facilities Engineer**. The Facilities Engineer will report to the Team Lead, Facilities Engineer. The Facilities Engineer will provide expertise and technical support with planning and executing concurrent fit-for-purpose facility and pipeline engineering. The workload will be split between new construction projects and providing engineering support for the Operations Group for the Management of Change Process, Pressure Equipment Integrity Management Program, and the Pipeline Inspection and Maintenance Program.

**Job Duties:**

- Manage projects from conception to commissioning, delegate and coordinate smaller projects and task efficiently to junior engineers/techs/analysts/EPCM consultants.
- Work with Production Engineer, Operations Foreman, and other stake holders to develop project scope document(s) for proposed projects;
- Identify any potential facilities related projects for optimization, loss prevention, or regulatory compliance and Bring those projects forward to Area Team, Production Engineer, or Operations Foreman (as appropriate) for economic review prior to implementing;
- Generate cost estimates and get appropriate approvals for facility and pipeline projects at direction of team or operations foreman and complete development circle with cost control/ forecasting and invoice approval;
- Manage all aspects of the electrical, civil, mechanical, and process design via contract engineers or in house;
- Manage construction using field Facility Construction Worksite Supervisors.
- Travel to job sites to participate in pre-job meetings, pre-startup checks, and as the need arises during the construction or for operation trouble shooting;
- Coordinate internal and external resources as required to prepare all regulatory applications, audit material, and secure permits including ABSA, AER, OGC, and municipal development permits as required;
- Build collaborative and respectful cross-departmental relationships.
- Provide mentorship and leadership skills within the department.
- Work closely with Procurement Management to ensure strategic selection of vendors and suppliers.
- Collaborate with the Surface Land group to coordinate the required notifications and land acquisitions related to each project;
- Provide visible leadership of Harvest's safety values and policies with staff, vendors and suppliers; and
- Other duties may apply.

**Qualifications:**

- B. Sc. in Engineering or Technology Diploma with minimum 8 years' experience, and a registered professional member in good standing with APEGA / ASET

- Experienced in licensing facilities with AER and BC OGC, Management of Change Process, Pressure Equipment Integrity Management Program as well as ABSA and BC OGC audits.
- Proven project management and technical skills associated with the planning, design and construction of Oil and Gas facilities
- Experience working within multi-disciplinary teams.
- Strong interpersonal and supervisory skills
- Sound business aptitude and acumen
- Effective analytical and organizational skills (time, people, and documents)
- Effective communication skills (written and oral)
- Strong work ethic with the desire to excel in a flexible, fast-paced environment.
- Working knowledge of regulatory standards and industries best practices (i.e. BC OGC regulations, AER regulations, ASME B31.3 and CSA Z662 codes and standards)
- Willing to travel.
