

Harvest Operations Corp. is a diverse energy company, based out of Calgary, offering exposure to conventional upstream oil and natural gas production and SAGD operations. We are focused on identifying opportunities to create and deliver value with an active development program and a technical approach taken to maximize our assets. Harvest is committed to protecting the health and well-being of our people, the public and the environment through every decision and action taken each day.

Harvest has an immediate opening for a **SAGD Production Engineer**, reporting to the Manager, Subsurface. This is a full time position located in Calgary, with a requirement for some travel to the BlackGold SAGD Facility near Conklin, AB. The successful candidate will work within a cross discipline team and will be responsible for the safe & compliant design, operation and optimization of multiple SAGD well pairs & associated support infrastructure.

Key Responsibilities:

- Provide production engineering expertise within a multi-disciplinary team to monitor, analyze and optimize SAGD well production
- Collaborate with both Field Operations and Reservoir Engineering to ensure adequate field surveillance and production data integrity
- Design, implement, operate and optimize well completions & artificial lift including; sand control, layouts, wellhead, monitoring and Electric submersible pumps (ESP), programs and well servicing activities.
- Plan and manage new well start-ups (steam circulation phase and SAGD phase)
- Responsible for development & implementation of a well integrity program
- Preparing business case and manage budget & forecasts for production & related Opex.
- Identify and recommend new technologies to improve the SAGD recovery process.
- Support Engineering teams in optimization of associated surface facilities.
- Support development of diagnostic/data monitoring tool for well pairs and pads
- Responsible for well related regulatory requirements & compliance
- Responsible for effective design and operation of water source, disposal & observation wells.
- Act as technical resource and provide support and direction, where required, to field operations and other disciplines within the oilsands team

Qualifications

- Professional Engineer with BSc in Engineering and registered with APEGA
- 10+ years related & progressive production engineering experience. Recent SAGD experience would be an asset.
- Commitment to responsible development & technical excellence, demonstrated through HSE performance, innovation and continuous improvement.
- Strong written & verbal communication skills, supported by excellent technical/system skills.
- Positive attitude and team player – excels as part of a multi-disciplinary collaborative team.

Successful applicants must provide acceptable evidence of being fully immunized against COVID-19 (two doses of Health Canada approved COVID-19 vaccine. Medical or religious exemptions may be considered and granted on a case by case basis.
