

Harvest Operations Corp. is a diverse energy company, based out of Calgary, offering exposure to conventional upstream oil and natural gas production and SAGD operations. We are focused on identifying opportunities to create and deliver value with an active development program and a technical approach taken to maximize our assets. Harvest is committed to protecting the health and well-being of our people, the public and the environment through every decision and action taken each day.

Harvest is actively seeking a **Process Operator** to join our team, reporting to the Shift Lead. This is a full-time position located at the BlackGold SAGD Facility near Conklin, AB. This position is classified as a Safety-Sensitive Position. You will be working a 7 on 7 off shift, alternating between days and nights. The successful candidate will reside in a camp facility on a rotational basis. Fly in Fly out from Calgary and Edmonton is available.

Key Responsibilities:

- Adhering to and enforcing safety policies and procedures.
- Responsible for the efficient operation of the plant process equipment.
- Monitor and control plant conditions and maintain proper documentation including safety and environment reports, operator logs, and maintenance records.
- Understand and perform safety, environmental and regulatory such as hazard identification, equipment lock out, emergency response, and implement safe working procedures.
- Actively control and manage processes in the facility during plant upsets.
- Supporting/responding to unit operations and equipment requirements, including Shift Turnover, Start of Shift orientation, Troubleshooting, and defined rounds.
- Ensure effective communication with the operations team members as well as maintenance, and supervisory staff.
- Participating in and maintaining all required safety certification and training.

Qualifications:

- **2nd class Power Engineering Certificate is preferred.**
- Minimum of 3 years of thermal operating experience with a combination of plant/field experience,
- A strong understanding of plant processes used in SAGD facilities.
- Must possess a valid Class 5 License.
- Able to interpret facility drawings, including shutdown keys, PID's and schematics. Experience with Distributed Control System (DCS) is an asset.
- Familiarity with writing Safe work Permits and the use of field-level Hazard Assessments.
- A solid understanding of processes and equipment used in the SAGD process including water-tube boilers, high pH mechanical vapour compressor evaporators, produced emulsion processing, diluent recovery, tank vapor recovery compression, tank inventory management, and produced water de-oiling.
- High awareness and understanding of potential process safety incidents.
- Self-motivated with a strong work ethic, good communication skills, and a positive attitude.
- Proficient with Microsoft Office programs (Excel, Outlook, and Word), software applications, and facility control systems.
